

Activate Faith (10 minutes)

Do the Masses Math

Ask kids to read and complete Do the Masses Math on the third page of the leaflet. Encourage the kids to work in small groups and be prepared to help with the math (or find a kid who can help with the math).

Answer Key

The average serving of bread is two small, round loaves.

- 7 out of 10 people had the average serving. $5000 \times .7 \times 2 = 7,000$
- 2 out of 10 people had 1 loaf. $5000 \times .2 \times 1 = 1,000$
- 1 out of 10 people had 3 loaves. $5000 \times .1 \times 3 = 1,500$

How many bread loaves were served? $7,000 + 1,000 + 1,500 = 9,500$

The average serving of fish is three fishes.

- 12 out of 20 people had 3 fish. $5000 \times .6 \times 3 = 9,000$
- 4 out of 20 had 2 fish. $5000 \times .2 \times 2 = 2,000$
- 2 out of 20 had 4 fish. $5000 \times .1 \times 4 = 2,000$
- 1 out of 20 didn't like fish. ZERO
- 1 out of 20 ate $3\frac{1}{2}$ fish. $5000 \times .05 \times 3.5 = 875$

How many fish were served? $9000 + 2000 + 2000 + 0 + 875 = 13,875$
